* This clause only applies when we offer our Introducing Brokers and Money Managers the capability of increasing the spreads which they in turn offer their own clients. 'Limit' and 'Stop' orders can be utilized at any time but there are certain restrictions regarding how close they can be set from the current market price. Minimum 'Limit' and 'Stop' order levels can be calculated by adding the advertised levels on our website to the additional spread charged by your IB or Money Manager. For example, if you are trading GBP/USD and your spread is widened by an extra 3 pips on top of our official spread then the minimum limit/stop order level will be 3 pips (advertised, official spread) + 3 pips (artificial spread widening) = 6 pips (total spread and minimum limit/stop level).
